At the full of the moon this moneth and next, gather your herbs to keep dry for the whole year, set Rosemary and Gilliflowers, sowe Lettice and Radish three or foure dayes after the full, and they will not run to seed; shear your sheep the moon increasing.

Let honest moderate labour & exercise procure your sweat, thin and light diet, and thrift thoughts tend to health: Lie not unadvisedly on the ground, or over hastily drink.

Sow Wheat and Rie, remove young plants & trees about the new moon, observing this as a seasonable secret, that in sering you carefully place that side to the South and West, which were so before you took up the Plant, otherwise the cold kills it: gather your remaining Winter fruit, set all kinds of Nuts & Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The garments you last moneth hung on your backs in jest, now button them close in good earnest; cloath you now for prevention, for the cold comes insensibly, and fogs oft times beget a whole winters cold. Consult with your Tailors as well as Physicians.

In the last quarter of the ☾ this moneth and the next, are the best times to fell Timber: Let Fowlers mind their Game. Cover all your best flowers & herbs from cold & storms with rotten horse-dung, look well to thy cattel, blood horses. Let a warme fire and a cup of Nectar be thy *Bath*, the Kitchin thy Apothecaries shop, hot meats and broths thy physick, and a well spread table the proof of thy charity to thy poor neighbours, to whom this advise is seasonable.

Being poor thy fate, and must not feast at all,
Thank God for such as thee to fasting call.

The best Physick is as before, a merry honest heart, & the exercise of charity among thy poor Neighbours

The Spring begins *March* 9 much about mid-night, at which time the Sun entreth the Æquinoctial signe *Aries*; causing an equality of day and night, all the habitable World over.

Summer takes beginning the 11 of *June*, a quarter past 2 in the morning, *Sol* then mounting the *Crab*, makes longest dayes, and shortest nights, on this side the Æquator.

Autumne, or Harvest quarter begins, the Sun entring the first scruple of *Libra*, which is this year *Sept.* 12, about 6 after noon equallizing again day and night.

Winter begins *December* 11, neer half an hour after 6 at night, the sun then entring the Tropical signe *Capricorn*, making then the shortest day, and longest night in the year, to all on this side the Æquator.

Of the Eclipses happning this present yeer 1661

There will be four Eclipses this yeer, viz. two of the Sun and two of the Moon, one of the first of the Sun and the last of the Moon will be visible to us in our Horizon.

The first is of the Sun the 20 day of March (according to Wing) neer 3 quarters past 9 in the forenoon, the beginning will be at 34 minutes past 8 in the morning, the middle at 40 minutes past 9 the end at 40 minutes after 10 the whol duration will be 2 hours and Halfe a quarter, Digits Eclipsed will be about 7 from the Sunn body towards the South Darkened.

The second is of the moon the 4 of April, between 3 and 4 in the afternoon, not seen of us.

The third Eclipse is of the Sun the 13 of September, but cannot (by reason of the great South Latitude the moon hath) be seen of us.

The 4 Eclipse is of the moon, September 28 neer 3 in the morning: This will be seen of us if the Sky be clear, the beginning will be at 3 quarters past one in the morning: the middle at 3: the end at a quarter past 4, the whole Duration will be 3 hours and a halfe, and about halfe the North part of the moons body will be Darkned.

The use of this Table, with a Caution.

Do but observe in the fifth Column of the Almanack the hours and minutes of full-Sea at London bridge over against each several day of the Moneth, to or from which time there noted, add or substract such hours and minutes as this Table above doth appoint, and the total of the one, or remainder of the other shall be the time of the full-Sea at any of these places aboveſaid, salved the Anticipation or protraction of time, which by the winds, Land-floods, or Moons latitude may be caused, which may be an hour, or sometimes more or less error, according to their site and quantity; a thing very remarkable of Sea-men when they pass by any Sands, over any barr or haven, or such like.
